

REX BAKER
SUPER 40
 OF NORTH AMERICAN BIG GAME

To qualify for the Rex Baker Super 40 of North American Big Game,™ you must have completed the Super Slam of North American Big Game® and legally taken free-range a minimum of 40 of the listed species listed below. For the Rex Baker Super 40, there are 44 species/subspecies and it includes all the animals needed for the Super Slam. Whereas the Super Slam list consolidates the Alaska-

Yukon barren ground caribou and the Arctic island caribou (listed as the barren ground caribou, not the central Canada barren ground caribou); the Rocky Mountain and desert mule deer; the Western and Eastern Canada moose; the grizzly bear and the barren ground grizzly bear—the Rex Baker Super 40 lists each subspecies separately. A member needs only one of the two of that particular category.
